Inibsa Hospital, a benchmark company in the hospital market, is part of Grupo Inibsa. It originally was a business unit of Laboratorios Inibsa, founded in 1948, and it has become a Grupo Inibsa company in 2013.

By restructuring itself and becoming a company as such, it has managed to improve its customer service, its efficiency, and to adapt to the new global situation of the national and international market.

Inibsa Hospital currently focuses on four main areas: Urology, Disinfection, Anesthesia, and regenerative medicine; and it also commercializes the referent antiseptic dressing, Nobecutan®.

Our commitment to quality and service is based on complying with the highest quality standards and European norms, thanks to a human team highly committed to achieving our targets.
Mission

We are a company which commercializes drugs, products, and healthcare for hospitals both nationally and internationally. Our customers are health professionals. As a company, we have a clear devotion to improving the quality of life of people, always through a strategy of innovation, developing new products, and the inclusion of novelties which improve the daily practice of health professionals.

Vision

Be a competitive company in the health sector both nationally and internationally, aiming at a sustainable and profitable growth that provides trust and satisfaction to our clients. We wish to develop a wide, competitive and innovative portfolio in anesthesia, to develop, distribute and provide benchmarking products and services in disinfection, and to be a company committed to innovation in the implementation of new products and treatments in urology and regenerative medicine.

Values

We must keep on building a workforce committed to the company and to the values of Grupo Inibsa. We want efficiency to become our need, innovation and knowledge creation to become our challenge, and teamwork to become our main strength.

In order to achieve this, all of us must feel it is our duty to develop an environment that encourages pride of belonging, respect and communication, as well as equal opportunities for employment, development and promotion for our professionals.

We must generate resources that ensure our future and satisfy accordingly those who interact with us (clients, suppliers, employees...).
Inibsa Group

Inibsa Hospital is part of Inibsa Group, a pharmaceutical corporation in the market for more than 70 years, which provides products and services to health professionals in the fields of dentistry, anesthesia, urology, gynecology, hygiene and disinfection, regenerative medicine and biotechnology.

Inibsa Hospital, as well as Inibsa Dental, are the two leading companies of the group. They have succeeded in becoming a reference in their area in Spain and Portugal and selling in more than 60 countries.

Our commitment to quality and service is based on complying with the highest quality standards and European norms, thanks to having the most advanced production technology, and a human team which is highly committed to achieving our targets.

All of this makes Inibsa a competitive, sustainable, committed group focused on internationalization and innovation.

Grupo Inibsa currently consists of three companies:

- Laboratorios Inibsa
- Inibsa Dental
- Inibsa Hospital

It also has its own subsidiary in Portugal called Laboratorios Inibsa Portugal.
Social commitment

En Inibsa Dental we believe that responsibility and a firm engagement with the society we live in, as well as quality, labor risk prevention, protecting the environment are three fundamental values for the sustainability of all of our activities, processes, services and products. We support projects which imply a clear commitment on innovation and development, aiming at offering a better life for the future generations.

Committed to society

We back different organizations and projects related to the social sphere, to answer the needs of the most disadvantaged groups.

Committed to knowledge

We support scientific societies which work on the future of society, to give new answers through innovation and knowledge creation.

Committed to the environment

The sustainable management of our activity is one of our priorities. As a company of Grupo Inibsa, we follow the norms defined in the ISO 14001:2004 environmental standard.

International projection

We are currently in the process of the internationalisation of our company, with the aim of consolidating the presence of our products worldwide in the upcoming years.

We market our range of cleaning and disinfection products of the Instrunet® brand in some countries and we are working to expand it to new international networks. To do this, we have the technical capability and the required facilities to deal with the regulatory challenges of the different existing markets.

The innovation of the products and materials that we sell, as well as the effectiveness of our processes, allow us to enter new markets and explore new business opportunities.
